Genetic Engineering, Ionizing Radiation and Sewage Sludge Declaration

*Submit one Declaration for each Product and one for each Ingredient. Product

Product Declaration:

Ingredient Declaration:

Name of Applicant: ATKINS, an AIR LIQUIDE COMPANY

Producer of Product or Ingredient Name: CARBON DIOXIDE

Is the product or ingredient produced through genetic engineering? Yes No

A variety of methods used to genetically modify organisms or+ influence their growth and development by means that are not possible under natural conditions or processes and are not considered compatible with organic production. Such methods include cell fusion, microencapsulation and macro-encapsulation and recombinant DNA technology (including gene deletion, gene doubling, introducing a foreign gene, and changing the positions of genes when achieved by recombinant DNA technology. Such methods do not include the use of traditional breeding, conjugation, fermentation, hybridization, in-vitro fertilization, or tissue culture.

Is the product or ingredient produced or handled using ionizing radiation? Yes No

Ionizing Radiation is also called irradiation, pico-waved, or cold pasteurization. In the case of products for use in food processing this does not include the use of microwaves or X-rays used for the purpose of inspection of food with X-ray tubes producing X-radiation from operation of the tube source at a 500 kilovolt peak or lower.

Is the product or ingredient produced or handled using sewage sludge? Yes No

A solid, semisolid, or liquid residue generated during the treatment works. Sewage sludge includes but is not limited to: domestic septage; scum or solids removed in primary, secondary, or advanced wastewater treatment processes; and a material derived from sewage sludge. Sewage sludge does not include ash generated during the firing of sewer sludge in a sewage sludge incinerator or grit and screening generated during preliminary treatment of domestic sewage in a treatment works.

The company producing this Product or Ingredient declares the above information to be true and understands that this information is subject to independent verification. The undersigned is a recognized agent of the Company above, and represents and warrants that the undersigned is authorized to act for the Company above relating to this document.
